Python • FastAPI • Next.js • React • LLM APIs • REST APIs • PostgreSQL • MySQL • Docker • Redis • Git • System Design • AI/ML • Anomaly Detection

SUMMARY

AI/ML-focused Computer Science undergraduate with a strong ownership mindset and ability to learn quickly and work independently. Experienced in building full-stack applications, Large Language Model (LLM)-powered agents, machine learning models for network anomaly detection, and production-ready backend systems. Proficient in Python, FastAPI, React, and Next.js, with a track record of writing clean, maintainable, and well-tested code. Active open-source contributor on GitHub. Passionate about applying AI to solve real-world problems in finance, networking, and developer tooling.

SKILLS

Programming Languages: Python, JavaScript, TypeScript, C, Java, HTML, CSS
Frameworks & Libraries: FastAPI, Next.js, React, Pandas, NumPy, Scikit-Learn, Matplotlib, TensorFlow/Keras, Framer Motion
AI/ML & LLMs: Convolutional Neural Network (CNN), anomaly detection, feature engineering, ML signal modeling, Google Gemini API, ChromaDB, Retrieval-Augmented Generation (RAG), ReAct agents, LangChain, fine-tuning (LoRA/PEFT), multi-agent orchestration
Databases: PostgreSQL, MySQL, MongoDB, ChromaDB
APIs & Auth: REST APIs, Upstox API, Google Gemini API, NextAuth, LLM APIs, real-time data pipelines
Tools & Platforms: Git, GitHub, Linux, Docker, Redis, AWS (EC2/S3), Microsoft Office, Blockchain (IPFS)
Soft Skills: Problem Solving, Adaptability, Communication, Leadership, Teamwork

EXPERIENCE

AI/ML Intern — teleSys Software Private Limited
June 2026 – July 2026 | Noida, Uttar Pradesh

- Worked on Implementing AI/ML in Network Intelligence, developing a Network Anomaly Detection System to identify unusual traffic patterns and potential security threats in network data.
- Performed data preprocessing and feature engineering on network traffic data, then trained and evaluated machine learning models for anomaly detection using Python, Pandas, and Scikit-Learn.
- Presented progress and results to the Technical Project Manager in regular project reviews and technical discussions.

Intern — Assam Startup, The Nest
June 2025 – July 2025 | Guwahati, Assam

- Conducted market research across 10+ startup verticals and analyzed social media metrics, contributing to a 20% improvement in digital engagement strategy.

PROJECTS

LEO – AI Coding Agent (2026)
Next.js, TypeScript, FastAPI, Python, Google Gemini API, ChromaDB | leo-frontend-eta.vercel.app

- Developed a full-stack AI coding assistant with a streaming agentic loop (ReAct-style plan → tool-call → result) backed by FastAPI and Google Gemini 2.5 Flash, with autonomous code generation, static analysis, and automated test generation.
- Implemented multi-agent orchestration with dependency resolution and Retrieval-Augmented Generation (RAG) memory via ChromaDB; wrote clean, maintainable, well-tested code with full ownership over end-to-end architecture and design decisions.
- Built Dockerized deployment with Redis-backed rate limiting, NextAuth authentication, real-time Server-Sent Events (SSE) streaming, and a Next.js eval dashboard.

TradeHelp – AI-Powered Trading Analytics Platform (2026)
FastAPI, React, Upstox API, Python, ML | tradehelp.tech

- Engineered a full-stack trading analytics platform for Nifty 50 and Sensex using FastAPI backend and React frontend, processing real-time market data via Upstox API with sub-second latency.
- Implemented 10+ technical indicators (RSI, MACD, Bollinger Bands) and trained Machine Learning (ML) models for buy/sell signal generation, achieving ~78% backtested directional accuracy; integrated FII/DII flow data improving signal confidence by 15%.

Cotton Plant Disease Prediction (2025)
Deep Learning | CNN, TensorFlow/Keras, OpenCV

- Designed and trained a Convolutional Neural Network (CNN) model on 5,000+ leaf images to classify 7 cotton plant diseases, achieving 92% validation accuracy through data augmentation and hyperparameter tuning, reducing overfitting by 18%.

POSITIONS OF RESPONSIBILITY

Organizing Committee — Pehchaan 4.0, Hypervision Student Society | UPES, Dehradun
2025

Organizing Committee — IBM ICE Day 2024 | UPES, Dehradun
2024

- Coordinated event planning, logistics, and participant management for IBM ICE Day, engaging 300+ attendees across technical domains.

EDUCATION

B.Tech in Computer Science and Engineering (AIML Specialization) — University of Petroleum and Energy Studies, Dehradun
2023 – 2027
CGPA: 7.3 / 10
